Frameworks & Libraries: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS, Socket.IO

Databases: MongoDB Atlas

Tools & Platforms: Git, GitHub, Firebase, Netlify, Vercel

Web Fundamentals: HTML5, CSS3, Responsive Design, Flexbox, Stitch, CSS Grid

EXPERIENCE

MERN Stack Developer Intern | Karachi

Feb 2025

- Built and maintained React.js frontend components and developed RESTful APIs using Node.js and Express.js on a real-world production project.
- Designed and managed MongoDB databases, integrating frontend with backend REST APIs for seamless data flow.
- Collaborated with the team using Git & GitHub, participated in code reviews, and made pull requests following Agile methodology.

PROJECTS

1. Saylani-Management Portal

- A full-stack management portal with three dedicated portals: students, prescriptions, and admins can oversee the entire platform.
- Built a secure login for all three roles using JWT authentication and OTP-based password reset via email.

Tech Stack: React.js, Node.js, Express.js, MongoDB

2. Event-Management System

- Car rental platform with dual portals where users can browse and filter and owners can list the name of the event, manage bookings, and track revenue from a dedicated dashboard.
- Implemented secure role-based login for both user and manager roles with secure password storage using image uploads.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS

3. Doctor Appointment System

- implementing real-time scheduling logic to eliminate appointment overlap.
- Built a secure login for all three roles using JWT authentication and OTP-based password reset via email.

Tech Stack: React.js, Tailwind CSS
